

Healthcare Practice Structure

Results achieved in prior matters are not meant to be a guarantee of success as the facts and legal circumstances vary from matter to matter.

Fundamental to opening a healthcare practice or forming affiliations among healthcare providers is determining the structure of the resulting entity. When structuring practices and affiliations, the Health Law attorneys at Wilentz, Goldman & Spitzer, P.A. will review with clients their different practice structure options and assist them with selecting the most appropriate one for their business. Further, in structuring transactions involving healthcare providers, we assist clients in navigating the complex regulatory environment to make sure that the structure resulting from the transaction is compliant, including counseling on the impact of the corporate practice of the medicine/dentistry doctrine on healthcare affiliations.
